

MAVIC

MY25

index

For over 135 years, Mavic has stood out for its commitment to innovation and excellence in the world of cycling. Today, we are proud to present our new range of wheels, an evolution of the famous Cosmic ranges, the expansion of our Gravel offer, and new solutions for e-bikes, developed to meet the needs of the most demanding cyclists.

In 2025, we celebrate 30 years of innovation with our legendary Cosmic range of wheels, which have been synonymous with speed, performance and reliability. For this year, we've updated this iconic range to ensure it continues to satisfy the most demanding cyclists, incorporating the latest technological advances to deliver unrivalled performance on the road.

In addition to our world-renowned road wheels, we are proud to expand our range of cycling equipment with a new collection dedicated to mountain bikers. Designed specifically to meet the needs of mountain bikers, this range combines robustness, comfort and innovation, enabling every cyclist to enjoy their off-road adventures to the full.

On behalf of the Mavic teams, we would like to thank you for your trust. Together, let's pave the way for this new era and continue to push back the boundaries of performance and innovation.

FRENCH MANUFACTURING
ASSEMBLED IN EUROPE

97% of the components of our wheels come from Europe. This is so we can guarantee the product is qualitative, reliable, durable and efficient so the customer can ride with confidence. Manufacturing in Europe significantly reduces our carbon footprint and leadtimes.

Environmental Ambition

100%

wheels are assembled in Europe
with 97% of European components

3.9 MWh

Annual production of electricity
generated by solar power in Chavanod

8

Electrical car charging terminals
installed in 2023 at Chavanod site

80%

Proportion of recycled aluminium
in our wheels since 2021

Lab test

In our laboratory we have 50 specific ways of evaluating our wheels, hubs and rims.

50 Tests in total

5 Standards tests

11 Endurance tests

9 Shock/crash tests

25 Static measurement tests

66 Active patents covering all our product lines worldwide (wheels, rims, hubs, footwear, helmets).

roots

Innovation

Over the years, we have participated in the evolution of the sport.

Our history is made of successes but also of failures.

Today, this desire to innovate and to shine in the future is unchanged and absolute.

1934

The "Dura" tube rim (750g vs 1,2kg) & Magne won TDF.

1979

The "Tout Mavic" group put the company into cycling's hall of fame.

1992

The 3G full carbon wheel with profiled spokes.

1997

The first wheels are launched with the Helium being lightweight for the mountains and the Crossmax for MTB.

1999

Mektronic is born as the first wireless electronic transmission.

2010

First wheel to tire system released on the market to create a better overall performance.

2016

First full carbon road tubeless wheel-tire system with a 100% safety guarantee.

2017

First shoe with a 100% carbon shell developed with top World Tour rider Dan Martin.

2021

First carbon wheel with fore technology

Technologies

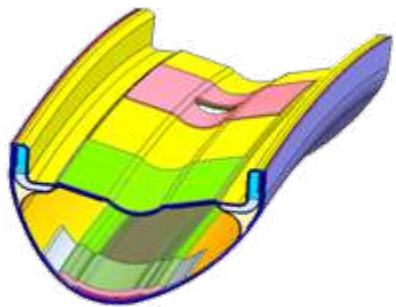

FORE CARBON

- Fully sealed upper rim bridge eliminates the need for rim tape
- Spoke directly screwed in the insert
- Lighter rim laminate
- A rigid rim that's 10% lighter and ultra-reliable

FORE ALUMINIUM

- Lower rim bridge is pushed inside then threaded
- Spoke nipples are directly screwed in the rim hole
- Upper rim bridge remains intact and airtight
- A tubeless rim that's 20% stiffer and ultra durable

ADAPTIVE LAY UP

- Strategically positioned carbon layering
- Local reinforcement at spoke holes
- Internal bladder removed manually
- Extensive lab and field testing
- Adaptive Lay Up saves 70g on the rim alone

INTER SPOKE MILLING (ISM- ISM 4D)

- In between spokes, areas with less stress are milled to the limits of aluminum
- At the spoke hole, the milling is tuned to withstand spoke tension
- Premium rim finishing, invisible weld
- A 15% lighter rim without compromising on reliability

Technologies

INFINITY
HUB

INFINITY HUB

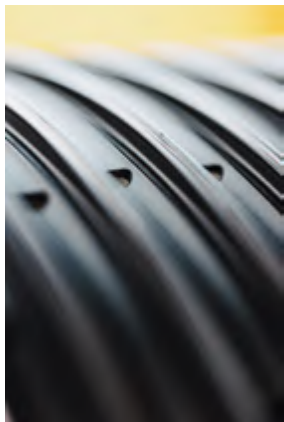

- New hub design with ID360 freewheel system
- Automatic bearing preload adjustment (QRM Auto)
- One spoke length only on disc wheels
- An ultra-reliable, high-performance hub concept.

INSTANT DRIVE ID360

- Double ratchet freewheel system
- Oversize axle and C3 bearings
- Tool free freewheel and axle compatibility swap
- Removable sound damper: loud or quiet freewheel sound option

ID360

BLACKSHIELD

- Double coated treatment
- Black anodized internal layer
- Second black matt external layer

BLACK
SHIELD

PINCH FLAT PROTECTION (PFP)

- An external shoulder is created during ISM
- The shoulder creates a wider contact surface at the top of the hook
- The wider surface decreases the risk of tire pinching

ROAD

COSMIC SL 40

CARBON

1.499,00€

Accelerate and climb faster, hold higher speeds

- 40mm NACA inspired rim shape minimizes drag for added speed.
- Reduced inertia of the lightweight rim delivers instant acceleration.
- Flat double butted spokes saves weight and improves responsiveness

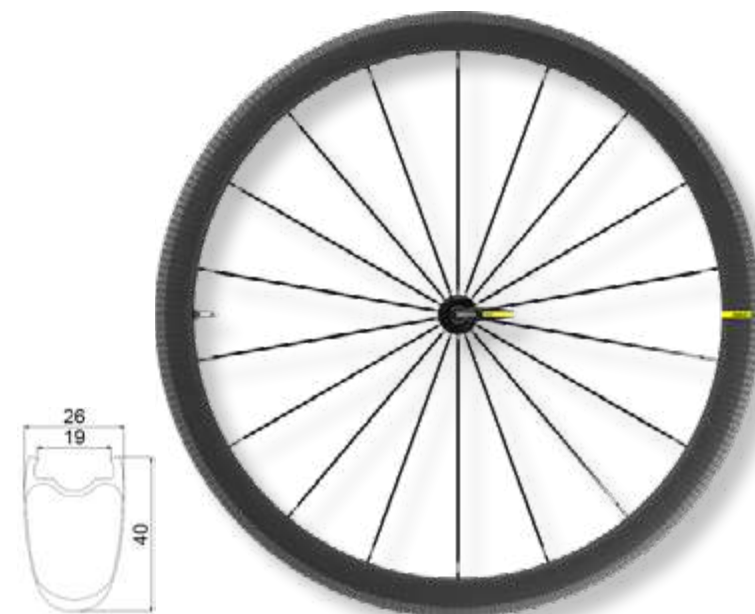

Versatile performance for all road riding conditions

- Minimal drag, low inertia and high lateral stiffness makes it fast and efficient on all types of terrain, from the flats to mountain climbs
- iTgMAX brake track offers the best braking efficiency and highest reliability of all carbon rims

Improved UST Road delivers more speed, comfort and control in an easy to use tubeless system

- No tubes means less friction, better efficiency and grip, a reduced risk of punctures
- New rim bed shape makes it easier to mount and change tires

EN 627 DISC 27,5

Designed for tubeless or tubetype mounting, the MAVIC EN 627 rim has a solid profile, making it ideal for particularly demanding All Mountain rides!

■ Holes	32
■ Spoke Bed Diam.	556
■ Weight	492 g

**EN 827 DISC 27.5**

The EN 827 is a high performance, tough, and dynamic rim. Its hookless design reduces the risk of damage from impacts.

■ Holes	32
■ Spoke Bed Diam.	556
■ Weight	490 g

**EX 1028 DISC**

Designed and engineered for the unique demands of enduro and downhill riding, the EX 1028 delivers a super strong/reliable and yet light package for a perfect custom gravity wheelset.

■ Holes	28/32
■ Spoke Bed Diam.	559
■ Weight	580 g

**EX 828 DISC**

Designed and engineered for the unique demands of enduro and downhill riding, the EX 828 delivers a super strong/reliable and yet light package for a perfect custom gravity wheelset.

■ Holes	38
■ Spoke Bed Diam.	558
■ Weight	600 g

**E-XM 430 DISC**

The entry level E-rim with special features

■ Holes	28/32
■ Spoke Bed Diam.	558
■ Weight	550 g

Available in 27,5 & 29 (yellow or black)

**E-XM 435 DISC 27,5**

The entry level E-Rim for big tyres, with special features

■ Holes	28/32
■ Spoke Bed Diam.	558
■ Weight	600 g

**XC 1025 DISC 29**

The high performance XC rim moves to the next level with a fast and light attitude.

■ Holes	28/32/36
■ Spoke Bed Diam.	597
■ Weight	510 g

**XC 321 DISC 29**

Mavic XC321 rim compatible with Tubeless or Tubetype mounting for XC/leisure use

■ Holes	28
■ Spoke Bed Diam.	598
■ Weight	565 g

**XC 421 DISC**

Available in 27.5 & 29

Designed for tubeless or tubetype mounting, the MAVIC XC 421 rim is a lightweight model for cross-country use.

■ Holes	28
■ Spoke Bed Diam.	558
■ Weight	419 g

**XC 425 DISC 29**

The best value fast and light rim gets wider

■ Holes	28/32
■ Spoke Bed Diam.	597
■ Weight	535 g

**XC 621 DISC**

Designed for tubeless or tubetype mounting, the MAVIC XC 621 rim is a lightweight model for cross-country use.

■ Holes	28/32
■ Spoke Bed Diam.	558
■ Weight	427 g

Available in 27.5 & 29

**XC 821 DISC**

Designed for tubeless or tubetype mounting, the MAVIC XC 821 rim is a lightweight model for cross-country use.

■ Holes	28/32
■ Spoke Bed Diam.	558
■ Weight	424 g

Available in 27.5 & 29

**XM 1030 DISC**

The high-performance trail rim moves to the next level with an agile and versatile attitude

■ Holes	28/32
■ Spoke Bed Diam.	560
■ Weight	575 g

Available in 27,5 & 29

**XM 430 DISC**

The entry level rim with special features

■ Holes	28
■ Spoke Bed Diam.	558
■ Weight	530 g

Available in 27,5 & 29

**XM 435 DISC 27,5**

MTB rim for entry-level large tyres with special features

■ Holes	28
■ Spoke Bed Diam.	558
■ Weight	570 g

**XM119 DISC**

The best value for money on the market

■ Holes	32/36
■ Spoke Bed Diam.	532
■ Weight	480 g

Available in 26, 27.5 & 29

SPEED RELEASE

A faster, lighter and safer through-axle system

**QUICK RELEASE**

High closure efficiency quick release

**FREEWHEEL BODIES**

You'll find here all the freewheel bodies to cover our diverse types of freewheel mechanism (ID360, ITS4, FTS-L) and the numerous cassette standards (Shimano HG, XD, XD-R, Microspline, Campagnolo ED, N3W, Singlespeed...).

FREEWHEEL PARTS

Find here the ratchets to maintain or update your ID360 freewheel mechanism.

**TUBELESS VALVES**

UST Tubeless valves ensures perfect airtightness with any Mavic UST wheels. Available for several rim depth.

**FRONT AXLE ADAPTERS**

Adapters for converting front wheel compatibility. Check the wheel page on our website (specification section) or go to technicalmanual.mavic.com to make sure you order the right adapter.

**REAR AXLE ADAPTERS**

Adapters for converting rear wheel compatibility. Check the wheel page on our website (specification section) or go to technicalmanual.mavic.com to make sure you order the right adapter.

**TYRE ACCESSORIES**

All you need to keep your tyres rolling

WHEELBAG

A wheelbag to carry and protect any wheel

**UST TAPE**

Tubeless tape for your Mavic tubeless wheels. Make sure you chose the right tape width according to the width of your rim.

**CARBON BRAKE PADS**

Pads specifically designed for efficient braking on any Mavic carbon rims

**EXALITH BRAKE PADS**

Pads specifically designed for efficient braking on any Mavic Exalith rims

**SPOKE MAGNET**

Computer magnets that suit any spoke shape.

**ABRASIVE RUBBER**

Cleans Ceramic and UB Control brake tracks to enhance braking performance.

Mavic care warranty and crash replacement program

Benefit from a LIFETIME WARRANTY and Crash Replacement

The manufacture of carbon wheels requires real knowledge. Mavic expertise ensures long-term reliability. For that reasons we guarantee the carbon wheels for life*. Also benefit from a discount on the purchase of your new wheels if you damage them in an accident.

Benefit from a 3-YEAR WARRANTY and Crash Replacement

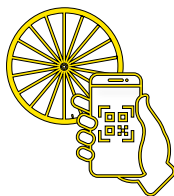

The manufacture of our aluminum wheels is the result of more than a century of development. This allows us to offer you a 3-year warranty on simple registration of your wheels. Also benefit from a discount on the purchase of your new wheels if you damage them in an accident.

Benefit from a 3-YEAR WARRANTY and Crash Replacement

Register your Mavic helmet and benefit from a 3-year warranty, as well as a 40% discount on the purchase of your new helmet if you damage it during a fall.

SERVICE FOR YOUR CUSTOMERS

2 REGISTER YOUR PRODUCT
WITHIN 60 DAYS
AFTER PURCHASE

3 ENTER THE SERIAL
NUMBER: REAR
AND/OR FRONT WHEEL

4 CONFIGURE
YOUR PROFILE
AND SUBMIT IT

*Reflecting that ethos, we provide a lifetime warranty on our carbon wheels (excluding Cosmic S 42 & S 40). This guarantee is only applicable to the original owner when the wheels have been registered on [mavic.com/care](https://www.mavic.com/care) within 2 months of purchase. It applies to all wheels from the 2021 collection onwards, purchased after September 1, 2020. They can be identified by a serial number starting with CFA214xxx or CRA214xxx and above. Similarly, our aluminum wheels and all our other products are covered by Mavic's statutory 2-year warranty. This warranty can be extended to 3 years for Comète Ultimate aluminum wheels, helmets and shoes when the product has been registered on [mavic.com/care](https://www.mavic.com/care) within 2 months of purchase.
The Crash Replacement warranty extension allows you to renew your equipment at a preferential price in the event of an accident. This applies to carbon wheels sold after September 1, 2020 (50% off for the first 2 years, 40% off for 3 to 5 years and 30% off for 6 to 8 years), as well as carbon wheels sold before September 1, 2020, aluminum wheels and helmets (40% off for the first 3 years). This Crash Replacement program does not apply to Aksium, Crossride, Crossmax and Allroad wheel models. All these warranties cover defects in materials and workmanship that appear during normal use of the product, with the exception of normal wear and tear.

 [mavic.com/care](https://www.mavic.com/care)

Mavic care

The MAVIC CARE programme applies to Carbon wheels (from Range 21):

Registration to MAVIC CARE	Warranty year	Crash Replacement (consumers)**	Loyalty Program (consumers)	Crash Replacement (retailers)**	Loyalty Program (retailers)
No	2	Not applicable	-30% off if spare parts sold out and wheels < 8 years	Not applicable	-30% off if spare parts sold out and wheels < 8 years
Yes	Lifetime warranty	-50% if ≤ 2 years -40% between 3 and 5 years -30% between 6 and 8 years	-30% off if spare parts sold out and wheels < 8 years	-40% if ≤ 2 years -30% between 3 and 8 years	-30% off if spare parts sold out and wheels < 8 years

Aluminum helmets and wheels (from Range 16):

Registration to MAVIC CARE	Warranty year	Crash Replacement (consumers)**	Loyalty Program (consumers)	Crash Replacement (retailers)**	Loyalty Program (retailers)
No	2	Not applicable	-30% off if spare parts sold out and wheels < 8 years	Not applicable	-30% off if spare parts sold out and wheels < 8 years
Yes	3	-40% if ≤ 3 years* Except for service wheels (Crossmax, Crossride, Aksium, Allroad)	-30% off if spare parts sold out and wheels < 8 years	-30% if ≤ 3 years*	-30% off if spare parts sold out and wheels < 8 years

* Except service wheels (Crossmax, Crossride, Aksium, Allroad).

**In return, MAVIC gets back the old wheel/pair.

Loyalty program

Mavic commits to keeping spare parts available for 7 years. After this period, if the parts are no longer available, Mavic offers (to the original purchaser of the wheel), a 30% discount on the PPC to buy a wheel/pair of equivalent range. In return, Mavic will take back the old wheel/pair.

For the retailer we also apply this 30% discount on the net standard price.

This program is valid up to 8 years after the date of purchase of the wheel.

Technical Manual

The technical manual: it is accessible to all, via the B2B portal and allows,

in the «Services» menu:

- access to notices, tyre pressure table with authorised rim/tyre combinations,
- access to the list of wheel adapters, safety data sheets for grease, oil, etc.
- access to maintenance videos of your products and technical information.

Mavic Service Center (MSC) return procedure

For all returns under warranty, crash replacement or loyalty program we advise you to contact the MSC to obtain a return number:

- by phone at 01908 102064
- by email to techservice.uk@mavic.com

The returns number must be written legibly on the outside of the package(s).

Any return sent without a return number provided by MSC cannot be considered and will be returned.

1 THE RETAILER WILL HAVE TO PREPARE THE PACKAGE FOR COLLECTION ON THE SCHEDULED DAY AND BY THE CARRIER APPOINTED BY MAVIC

Be careful: the transport management is organised by MAVIC. Please do not send anything with your carrier (unless otherwise indicated by our services).

In the case of a return under warranty, no request can be taken into account without a photocopy of the original purchase invoice given to the consumer.

Include an envelope in the package containing :

- your contact details and customer code,
- the return number and the reason for the return,
- Very important, the proof of purchase.

Please note: unless otherwise specified by MSC, the wheels must be sent clean and without tyres, tubulars, quick release, cassettes, brake discs, wheel bag or any other accessories to avoid any loss or damage. If the braking surface is affected by the reason for return, the brake pads must be returned with the wheel.

MAVIC cannot be held responsible for loss or damage to these items if this rule is not followed.

2 THE MSC WILL CARRY OUT A DIAGNOSIS ON RECEIPT OF THE PACKAGE AND WILL DECIDE WHETHER OR NOT THE PRODUCT RECEIVED IS COVERED BY THE WARRANTY, AND WILL THEN REPAIR OR REPLACE IT, AT MAVIC'S DISCRETION.

- In the event of a refusal to accept the guarantee, the MSC will inform of the reason(s) for this decision and the possible cost of the repairs.
- Without a response from the retailer within 10 days, a reminder email will be sent. If there is no answer after 5 extra days, the product will be returned to the shop and the shipping cost will be charged.

In the case of a chargeable repair, the MSC will send a repair estimate by email, after reception and analysis of the product. This estimate will detail the planned operations, their costs for compliance and the shipping costs. The planned operations are non-negotiable and can only be accepted in full: the MSC has all the expertise to determine the operations necessary to make the product compliant and safe for use by the consumer within the framework provided by MAVIC. In case of refusal of part of the operations planned by the MSC, MAVIC reserves the right to consider the quotation as null and void and to return the product as it is without further notice.

- The start of the repair of the product will be conditioned by the acceptance of the quotation by the dealer or by the online payment of the consumer.
- Shipping costs are at the customer's expense.

MSC charged Repair and Service price list 2025

The price does include MSC labour and spare parts needed, including full wheel control & servicing but doesn't include freight cost.

The replaced parts will not be returned and will be refurbish by MAVIC.

In case of partial agreement, MAVIC could refuse to repair a wheel for safety reasons.

Replaced spare parts and corresponding labor are covered by MAVIC warranty for 2 years.

A new era for our cycling shorts

We worked with an Italian pad specialist, using a scientific approach, to develop our new proprietary range of pads. A range structured around 3 riding programmes : performance, long-distances, training rides.

New ergonomic shape for improved feel when riding out of the saddle

This new generation of pads uses an ergonomic shape that maximises pad flexibility. Our aim is to make pads so comfortable you won't even notice them once on the saddle. Greater flexibility allows the pad to fit perfectly your morphology, reducing frictions and that unpleasant feeling of thickness when riding out the saddle.

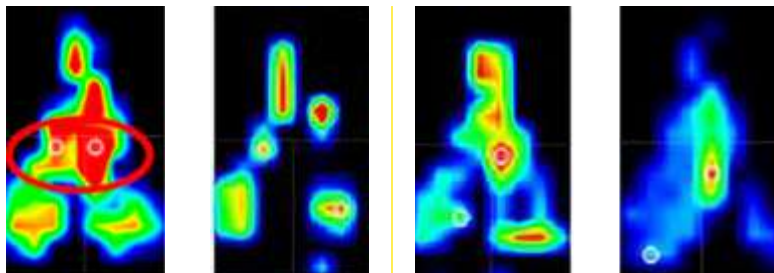

Cushion pad SS24 and before

Endurance pad FW24/SS25

The right foam combination at the right place

Keeping ortholite inserts that made the success of our previous generation of pads, we have redesigned the foam formula to increase comfort. Adding thickness on key areas, reducing thickness on others, are the small details that make all the difference.

After thousands of miles of laboratory and field testing, we are proud to have found the right formula to improve comfort for all our pads.

NEW DEEMAX ENDURO SS JERSEY M**Honeycomb fabric for enhanced breathability**

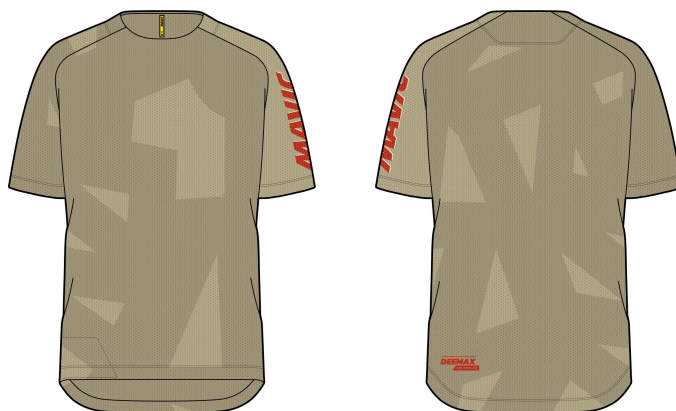

■ We have selected a mid-weight honeycomb fabric as a good compromise between abrasion resistance and pedaling comfort. Unlike many other mountain bike jerseys, the honeycomb structure of the fabric acts like a sponge, allowing moisture to be wicked away efficiently as you pedal up to the next descent.

Enduro specific fit and features

■ Not too tight, not too loose, our enduro fit looks and feels great whether or not you are wearing a body armor (no need to size up if you are using low-profile D30® protections, or equivalent). Our enduro jerseys include an integrated google wipe.

JERSEY

85,00€

NEW DEEMAX ENDURO PRO LS JERSEY M

Excellent moisture management

■ We have designed this jersey to be the most comfortable when pedaling between stages, even on hotter days. The square structure of the main fabric creates micro ventilations that enhance moisture management and keep you cool at all times. We chose it light and fluid so you'll be the most comfortable when pedaling, but strong and thick enough to be your go-to jersey all year round.

Enhanced durability

■ We all know crashing is part of the game, yet replacing your jersey after every crash is not. That's why all fabrics used on our mountain bike jerseys are tested and selected for their snagging and abrasion resistance. To further increase durability of our Deemax Enduro Pro jersey, we've used an high-density knitted fabric on sleeves that promote durability without weighing the jersey down.

Enduro specific fit and features

■ Not too tight, not too loose, our enduro fit looks and feels great whether or not you are wearing a body armor (no need to size up if you are using low-profile D30® protections, or equivalent). Our enduro jerseys include an integrated google wipe.

PANT

NEW DEEMAX ENDURO PANT M

109,00€

4-way stretch, water-repellant and durable fabric

■ We have built these pants with a mid-weight 4-way stretch fabric, which combines :

- abrasion resistance for your most committed rides,
- comfort when you are pedalling even on the hottest days.

Vents are strategically placed to enhance moisture wicking and increase comfort.

A PFC free DWR finish is added to the fabric in order to protect you from light rain and mud splatters.

Perfect fit

■ Our Deemax Enduro pants are specifically designed to be comfortable when riding with knee pads. They feature a tapered leg to minimize interferences when peddalling while giving you more room for your thighs. Neither too tight, nor too baggy, you'll be wanting to keep them on for the post-ride drinks.

2 zipped pockets and 2 deep hands pockets

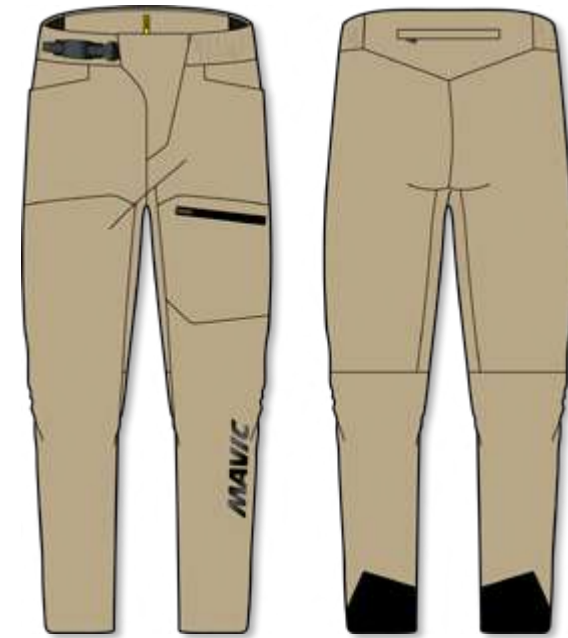

■ We know more and more riders are willing to ride without packs. To help you feel lighter on trails, we designed these pants with two deep hand pockets, one zipped pocket on the thigh, and one zipped back pocket that is ideal to keep your phone or keys secured without bouncing around.

NEW CROSSTRAIL PADDED SHORT M**4-way stretch, water-repellant and durable fabric**

■ We have built the outer shorts with a mid-weight 4-way stretch fabric, which combines :

- abrasion resistance for your most committed rides,
- comfort when you are pedalling even on the hottest days.

A PFC free DWR finish is added to the fabric in order to protect you from light rain and mud splatters.

2-in-1: use the outer and the padded shorts independently, or combine them

■ The Crosstrail padded shorts are not just lightweight mountain bike shorts with padded inner shorts. They are a 2-in-1 cycling shorts that you can use separately or combined to suit your needs on the day.

The inner shorts are a genuine cycling shorts made with a light and resistant fabric. They feature 2 cargo pockets, made with the same abrasive resistant fabric, so you can keep your phone close at hand or stow your snacks. You can ride without the outershort for a more aerodynamic look, you gravel rides or even your occasional road rides.

ErgoEssential pad : progressive cushioning for both on and off-road rides

■ We have designed the shape and curvature of our Ergo Essential pad to increase flexibility and freedom of movement, so you won't feel it when riding out of the saddle.

Its 2 different foam densities will provide a progressive cushioning that will suit any ride, whether off-road, on gravel or on the road.

JERSEY

129,00€

NEW COSMIC JERSEY M**Moisture management and aerodynamism**

■ To help you crush your PR we have made a jersey that combines aerodynamism, extreme breathability, and lightness. To achieve this, we took the most out of 3 different fabrics :

- Aerodynamic sleeves with a specific stripped pattern that mitigate aero drag ;
- Light and breathable torso ;
- Ultra-breathable back panel using our 3D mesh fabric. It's alveolar construction acts like sponge to wick moisture away during efforts, keeping you at the right temperature.

Performance fit

■ The cosmic jersey has been designed with a performance fit : a closer fit that feels like a second skin, and a front zip shorter so there is no compromise on aerodynamics. If you are looking for a fit that promote comfort over best-in-class aerodynamism, please refer to our Aksium and Ksyrium range.

Premium features

- Our cosmic jersey features high-end finishing :
 - Raw edge cuts and glue bias give a clean seamless look and feel ;
 - Grippers are place at the bottom hem to secure a perfect fit during your outings ;
 - Reflective details increase your conspicuity in low-visibility conditions.

PRODUCT DETAILS

HERITAGE JERSEY M

Stylish design celebrating Mavic's historic heritage in cycling

Inspired by Mavic's historic heritage in cycling, the design celebrates our first logo for your ride.

Stay cool, dry and comfortable in hot weather

The made in Italy 3D mesh structure on front enables sweat management and cooling airflow while being UV protective (UPF 30).

Close, next-to-skin fit offers improved moisture management.

Functional cycling features

3 open pockets with gusset for increased capacity.
Reflective detailing for visibility in low light conditions.
Silicone waist grippers comfortably holds jersey in place.

PRODUCT DETAILS

- Elastic gripper with silicone
- Full front zip - Staydown puller
- 3 back pockets

COMPOSITION

- Body: 90% PES, 10% EL

NEW **COSMIC PRO BIB SHORT M****Comfort and freedom of movement for rides up to 7 hours**

We redesigned the shape and curvature of our Ergo Contact pad to increase flexibility and freedom of movement, so you won't feel it when riding out of the saddle. Our tried and tested 3-layers construction with an OrthoLite® insert offers the best compromise between cushioning and feeling on the bike so that you can focus on your performance, whether you are racing or chasing a KOM.

Muscle support to boost your performance

To mitigate fatigue and help you endure longer rides more efficiently, we have selected a premium french fabric which combines abrasion resistance and muscle support.

Specific X shape suspenders that promote breathability and long-last support

We've designed X-shaped braces with two different levels of tension to stabilise the chamois, keep the shorts perfectly in place and promote breathability in the lower back compared to a standard mesh back panel.

BIB SHORT**NEW COSMIC ULTIMATE BIB SHORT M**

199,00€

Comfort and freedom of movement for rides up to 7 hours

■ We redesigned the shape and curvature of our Ergo Contact pad to increase flexibility and freedom of movement, so you won't feel it when riding out of the saddle.

Our tried and tested 3-layers construction with an OrthoLite® insert offers the best compromise between cushioning and feeling on the bike so that you can focus on your performance, whether you are racing or chasing a KOM.

Muscle support and lightness

■ We have designed these bib shorts to help you perform on race days. Following this spirit, we have selected an highly supportive fabric (made in France) that mitigate vibration during high intensity rides. This will help you to ride longer in a more efficient way.

And because we know that every gram counts, this fabric is up to 20% lighter than a conventional cycling short fabric while being ultra-resistant to abrasion.

Longer inseam and high-end features to promote performance

■ When it comes to designing these ultimate bib shorts, we made sure that every feature was performance-enhancing :

- A longer inseam, raw edge cuts combined with pre-shaped patterning increase aerodynamics and comfort;
- A unique seamless construction is used for every part of the bib shorts, avoiding any pressure points and ensuring you stay focus on your race.

ALLROAD CARGO JERSEY M

Stay dry and comfortable for any adventure

■ Riding off-roads often implies riding steep climbs at low speeds. To help you staying comfortable, we selected a polyamide fabric with a special construction that enhances moisture management and breathability with no compromise on durability.

Extra durability

■ Riding off-road, you may face abrasion and tears from the wild vegetation, as well as an increased risk of falling off your bike. That's why we think durability should be a prerequisite for any jersey dedicated to gravel or bikepacking :

- The main fabric is polyamide to resist abrasion and snags;
- The pockets are made from a special abrasion-resistant woven fabric (made in France) to protect the sides and bottom of the jersey;
- Additional reinforcements are strategically placed on the shoulders to protect your jersey from the abrasion of your hydration pack.

Extra storage capacity

■ 3 open back pockets with gusset to increase capacity.
2 close zipped pockets for valuables.

PRODUCT DETAILS

- 3 rear pockets + 2 side pocket + 1 zipped pocket
- Reflective highlights

COMPOSITION

- Body: 75% PA, 25% EL

SHORT

NEW ALLROAD CARGO BIB SHORT M

159,00€

New endurance pad ideal for your 7+ hour rides, or any riders over 80kg

Endurance riders who spend the day sitting on the saddle will appreciate our new ErgoEndurance pad. Through lab and field testing we developed a new ergonomic shape that redistribute pressure homogeneously.

Our 4-layers construction with an OrthoLite® insert offers the best of cushioning and vibrations absorption for your 7 hour rides, and even more !

This insert is also the ideal choice for any rider over 80kg.

Muscle support to mitigate fatigue

When riding on single tracks, gravel or rough roads, activity in the supportive muscle increases. Vibration will create micro-tears and early fatigue in your leg muscle. To counteract this effect and help you endure longer rides more efficiently, we have selected a premium fabric (made in France) which combines abrasion resistance and muscle support.

Long-distance features

Two side cargo pockets are perfect for keeping your phone or your nutrition close at hand.

Breathable, perforated bib straps keep you cool when you're working hard.

The raw-edge bottom hem with silicone print keeps the shorts comfortably in place.

Large focus on head protection

■ In-mold shell construction with EPS material over molded to PC shell offers lightweight helmet construction with maximum impact resistance. PC shell enhances shocks dispersion, while the expanded polystyrene (EPS) helps to absorb shocks. The deep side panels and more head coverage promise additional safety. Reflective details on straps and on head adjustment system bring visibility.

Special attention to eyes protection

■ The visor protects against wind and rain in city traffic, as well as UV rays. It offers enough space to be compatible with any glasses or sunglasses. Easily replaceable, you can change it for a category 1 sun protection visor with anti-glare treatment, available as a spare part.

All-season comfort and instant fit.

■ The Fidlock magnetic buckle enables intuitive one-handed closure and release. The retention system and adjustable straps allow the helmet to fit all heads. 17 vents designed to ensure maximum ventilation while limiting water ingress in the event of rain. Winter kit included with the helmet to keep you warm and comfortable in winter.

WEIGHT (G) / SIZE **380 / M**

High aerodynamic performance tested in wind tunnel

Optimized shape and low-profile tail minimizes wind drag to enhance aerodynamic performance. Tested in HEPIA Geneva Wind Tunnels.

Effective air cooling for high-paced riding

Front vents connected to deep ventilation channels creates airflow that cools the head and evacuates moisture through the rear carbon vents. The choice of the new MIPS AirNode, narrower and integrated into the padding, also contributes to a better ventilation.

Precise fit and ergonomic use

Ergo Hold SL+ retention system offers pinpoint adjustability and comfortable head hold. Autofit straps go around your ears, don't twist, and fit seamlessly with all glasses. Glass Garage allows you to safely store your shades when you need to take them off. FidLock magnetic buckle grants easy one-hand release.
