manufacturing excellence at cinelli's hq

At Cinelli, we take immense pride in the craftsmanship and precision that go into every Nemo frame. All Cinelli Nemo frames are meticulously manufactured at our headquarters in Milan, Italy. This centralization of production within our Milanese HQ represents one of the most efficient supply chains in the cycling industry. Our unique advantage stems from the close proximity of our sister company, Columbus, which shares the same premises. This arrangement allows for seamless collaboration and communication across design, engineering, manufacturing, and tubing departments, ensuring that every frame meets our exacting standards.

enhanced product design and quality control

The internal frame-building process not only shortens the supply chain but also enhances product design and features. The rapid prototyping capabilities afforded by our integrated operation enable us to quickly iterate and refine our designs. The close-knit interaction between different departments ensures that each frame is crafted with precision and rigorously tested for quality. This meticulous attention to detail guarantees that every Cinelli Nemo frame that leaves our headquarters is of the highest quality, ready to deliver exceptional performance and reliability to cyclists around the world with the finest frames crafted in the heart of Milan.

made in milano

simplified colour choice

In 2025, we have streamlined the range of colour choices available for the Nemo to better serve our customers and assist dealers in presenting our products more effectively. We have introduced a predefined decal colour that will be consistent across all models, complemented by six continuous colours. This thoughtful selection simplifies the decision-making process for customers, ensuring they can easily find a Nemo frame that suits their style and preferences. Additionally, the simplified colour range helps dealers host accurate and appealing in-store displays, making it easier for customers to understand and appreciate the different options available.

- green pink
- gold pink
- pearl white
- green
- curry yellow
- brown

introducing the colour of the year 2025: oatmilk

One of the most exciting updates to the Nemo range for 2025 is our new “Colour of the Year” project.

This initiative showcases a fresh, youthful graphic scheme and a distinctive new colour that will be available exclusively for the year 2025 across all Nemo platforms. The 2025 Colour of the Year is OATMILK. This unique and stylish shade will be offered for one year only, making it a special and limited-edition option for our customers around the world.

pressure II

The ultimate Italian aerodynamic high-speed road riding experience. New and improved 100% Milanese design.

pressure II

frame-kit - complete bike

- Reduced weight (-109 g)
- Modified carbon fiber layup for improved ride quality and reliability
- Increased tyre clearance (32mm)
- 100% Milanese design
- UCI approved
- Full pro features:
 - racing geometry
 - over benchmark stiffness
 - aero-enhanced tubing profiles
 - integrated cables

Born to race, Pressure is the pinnacle of Cinelli's road bike design language. Obsessively re-engineered seatpost length, clamp mechanism and cable guides reduce the weight of the Pressure II framekit by 5% relative to its predecessor. Refined over 4 different samples the Pressure II's carbon fiber layup represents what our R&D team and pro riders believe to be the best ratio between weight savings, race stiffness and reliability. In line with most recent studies in aerodynamics, rolling resistance and - most importantly - the continuous hybridization of the road bike, the Pressure II features 32mm max tyre clearance.

pressure adr

Pressure ADR takes the racing technology of the Pressure and re-engineers it for improved comfort and handling for endurance and long-distance riding, without losing the pure race feel.

pressure adr

frame-kit - complete bike

- Tuned for ultimate racing comfort
- Aggressive rider position
- Integrated seatpost clamp and cable routing
- Possibility to customize build with after-market components thanks to the standard seat post and fork steerer diameters

The Pressure ADR continues to refine the design and performance developments of our aero-racer, the Pressure fine tuning it for epic, long-distance racing. The ADR in fact maintains the signature pure competition handling and feek of the Pressure, fine-tuning tube sections and carbon fiber lay-up to make it more suitable for long hours in the saddle. These engineering considerations are complemented by fully-integrated cable routing and the use of standard seatpost and fork steerer diameters, allowing the owner to easily install world-leading after market component solutions.

frame-kit - complete bike

- Beloved by riders for its smart mix of low-weight, aggressive handling over highly varied terrain and long-distance riding comfort
- Classic Italian grand tour geometry
- Shaped for maximum control and efficiency of carbon fiber lay up
- 12mm thru-axle

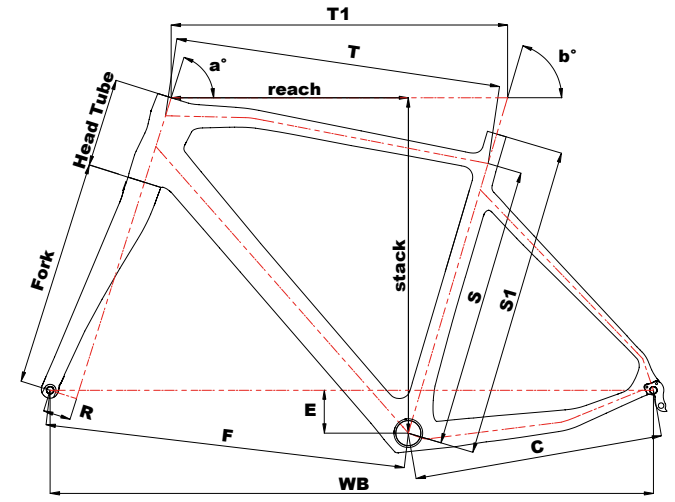

The Superstar is Cinelli's carbon fiber re-interpretation of the Italian stage-racing bicycle that is the brand's heritage and DNA. When developing the Superstar, Cinelli engineers studied how the inherent qualities of carbon fiber and its manufacturing processes could be employed to produce a contemporary iteration of the legendary versatility of the Italian Grand Tour ride quality i.e. the intelligent balance of low-weight, aggressive handling over highly varied terrain and long-distance riding comfort. In fact, owners of the Superstar will always tell you what they love most about the bike is its superlative ride quality!

nemo tig road

Cinelli's 100% Made in Milano steel road flagship hybridizes heritage with contemporary performance to create a new icon of Il Grande Ciclismo.

nemo tig road

frame-kit - complete bike

- T47 bottom bracket allows for full internal cable routing (including Columbus Trittico cockpit) as well as improved stiffness
- Ultralight CNC aluminium seatpost collar reduces weight and improves product life
- seatpost tube and diameter reduces weight and improves comfort
- As of March 2023 all Nemo frames are manufactured within the Cinelli Milan HQ by our internal framebuilder allowing us to create the world's shortest supply chain for premium road bikes.
- Lasercut minimalist brake bridge for further weight savings
- Geometry
- Custom drawn Columbus Spirit triple-butted tubes
- Increased tyre clearance 32mm
- Classic Italian racing geometry
- Design-driven detailing and finish
- Available in 6 different paint
+ 1 Colour of the Year

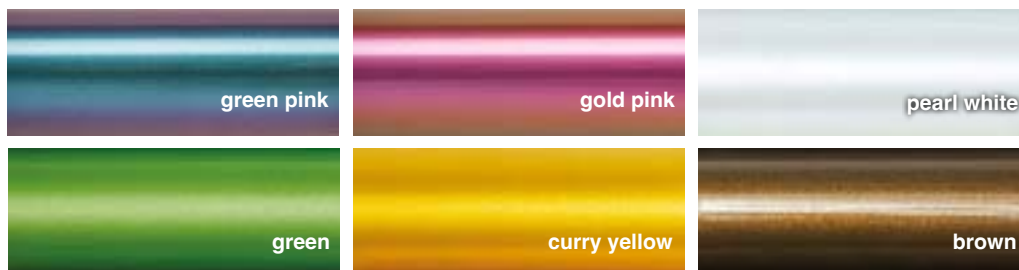

specs

FRAME WEIGHT (M)	FORK WEIGHT (M)	BOTTOM BRACKET	MAX TYRE
2000 g	392 g	T47	32 mm

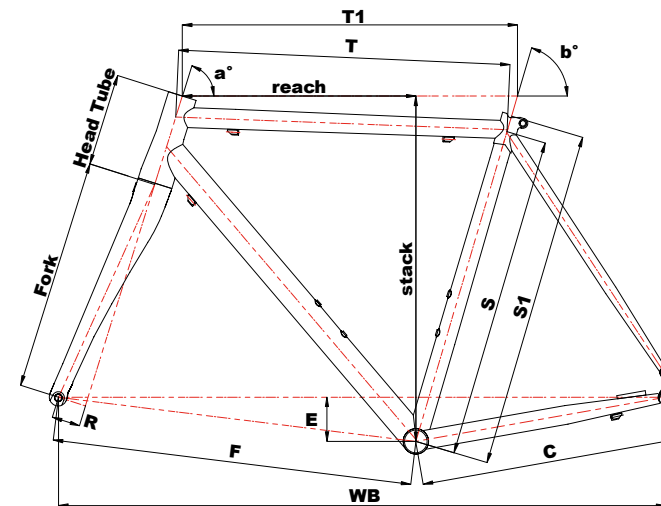

The Nemo is Cinelli's flagship steel road bike, handcraft to hybridize our more than 75 years of Italian cycling heritage with the performance possibilities of contemporary cold-drawn steel tubing technology. Every Nemo frame is handwelded by Cinelli's internal framebuilder in its Milanese HQ, using custom drawn triple butted tube drawn by its sister company Columbus, less than 100 metres from the framebuilder creating the world's shortest performance bicycle supply chain.

Thanks to continuous three-way dialogue between the Cinelli design office, our framebuilder and Columbus – the Nemo has undergone subtle but significant manufacturing improvements including a 205g weight reduction (size Medium), the introduction of the T47 bottom bracket allowing for fully-internal cable routing as well as improving stiffness and a new ultralight CNC'd aluminium seatpost collar.

king zydeco II

King Zydeco II is the fastest and lightest gravel bike ever made by Cinelli. Perfect for UCI gravel races, Endurance races, fast mixed surface rides, winter training.

king zydeco II

frame-kit - complete bike

- 15% lighter than previous generation
- Columbus Components Allroad Cockpit and Seatpost reduce weight and increase reactivity and visual prestige
- Double Response layup and design system for best handling experience
- Full cable integration
- Fine-tuned fast gravel geometry
- Signature Cinelli attention to details design

When assembled with its proprietary Allroad cockpit and seatpost, the Zydeco King II framekit is an impressive 400g lighter than the original King Zydeco framekit, while stiffness values remain relatively in-line, with a significant increase in Bottom Bracket's (5%) and frontal stiffness. Furthermore the new King Zydeco II maintains the Dual Response System and the race-proven geometry of the King Zydeco, while adding an extra size (XS) and a more linear progression of stack and reach between sizes to improve tailored bike-fitting. Cinelli's signature attention to detail include the sleek modernist shape of its profile, the full cable integration, the custom top tube cover plate, the clean lines of its proprietary Allroad cockpit and seatpost.

king zydeco

A pioneer of the European gravel riding movement, the King Zydeco is our go-fast-everywhere monocoque carbon fiber frame.

king zydeco

frame-kit - complete bike

- Performance gravel geometry
- Tyre clearance up to 700x47c or 650x2.1"
- Adaptive geometry thanks to Columbus fork dropouts that allow to change the rake from 47 to 52 mm
- Double response stiffness/compliance frame design for best off-road riding experience
- Downtube kevlair shield
- Bike packing ready rivet system

A pioneer of the European gravel riding movement, the King Zydeco is a go-fast-everywhere monocoque carbon fiber frame, perfect for competitive gravel riding and fast touring/endurance racing.

The engineering heart of the frame lies in the mould's transition between top tube and seat stays, specifically developed to allow for fibers to be continuously aligned allowing for significant weight reduction, optimization of the lay up and above all superior distribution of vibration arriving from the rear wheel.

Working in tandem with the oversized tube sections of the down and head tube a "double response system" of finely tuned stiffness and compliance is created. The emotional heart of the frame lies in exploring new attitudes and emotions on adventures you didn't previously think were possible!

zydeco

Our original gravel bike, loved by riders across the world for its lightweight performance feeling combined with ultra-versatile design details making it ready for both city and mud!

zydeco

complete bike

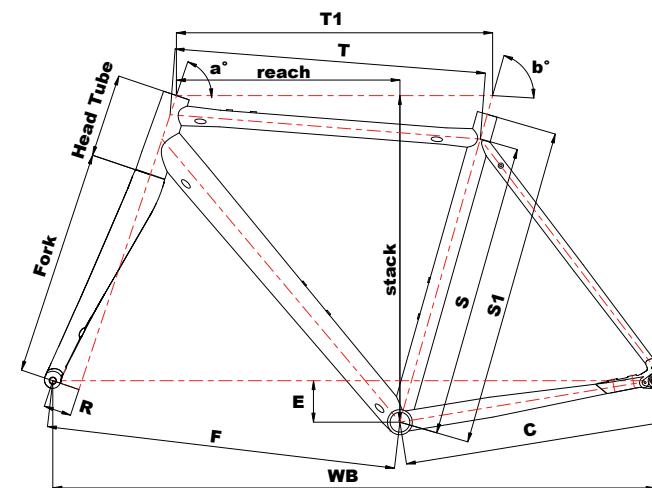

- Our original gravel bike
- Oversized triple-buttet Columbus Zonal aluminium tubing
- All-weather urban commute to performance gravel adventure versatility
- Custom rivet system allows user endless bag and rack options
- Max tyre clearance 700x40c
- 10,3kg total bike weight

The most beloved of all Cinelli gravel bikes, the Zydeco's appeal lies in the quality of its manufacturing (triple-buttet Columbus Zonal aluminium tubes) and finish as well as its absolute versatility. Beyond its primary function as a performance gravel bike, the Zydeco can quickly morph into a bike-packing vehicle or fast all-weather urban commuter thanks to its exhaustive system of rivets.

zydeco electric mud

An ultralight, true gravel geometry,
E-bike for expanding the horizons
of your off-road riding.

zydeco electric mud

complete bike

- T800 Monocoque carbon frame and fork for 12,8kg complete bike weight
- 100km or 1000m ascent range for new adventures
- Internal hub motor allows for the E-Mud to maintain a 100% pure gravel geometry
- Dedicated app for all functions, custom configurations and detailed info
- Mahle Ebikemotion X35 engine

The Zydeco E-Mud is Cinelli's first e-bike, fruit of our experience developing the iconic King Zydeco. The E-Mud in fact maintains the same geometry and mould features of the King to guarantee a pure, unadulterated fast gravel feeling for the E-Mud. The use of an internal hub in fact allows for shorter chainstays than other Gravel e-bikes on the market and thus a faster, funner ride. Other features include 12,8kg complete bike weight, 100km or 1000m ascent range and a dedicated app for custom configurations and data.

nemo tig gravel

The ultimate designer gravel bike. Made in Milano, fine-tuned for the world's most extreme gravel adventures.

BAD WORDS
MAKE
GOOD BIKES

nemo tig gravel

frame-kit - complete bike

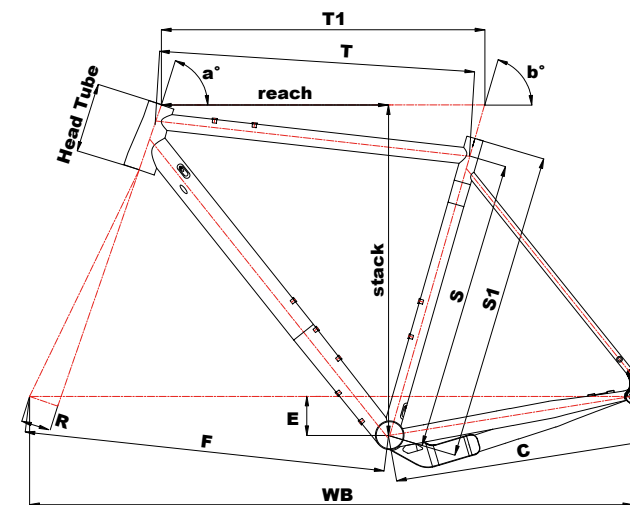

- Completely re-designed geometry for more extreme terrains
- 700 x 47mm \ 650b x 50mm tyre clearance thanks to our proprietary investment cast yoke
- Designed specifically for Hi-Ride Sterra fork system: 20mm of true hydraulic travel optimized for gravel riding combined with stiffest gravel suspension legs on the market, low maintenance and many other features.
- As of March 2023 all Nemo frames are manufactured within the Cinelli Milan HQ by our internal framebuilder allowing us to create the world's shortest supply chain for premium road bikes.
- Custom-shaped seat stays with oriented ellipses and lowered seat tube welding pointing to optimize long-distance comfort
- Seat collar
- Custom drawn Columbus Spirit triple-butted tubes
- Adaptive geometry on rigid fork option thanks to Columbus fork dropouts that allow to change the rake from 47 to 52 mm
- Design-driven detailing and finish
- Available in 6 different paint + 1 colour of the year

specs

FRAME WEIGHT (M)	FORK WEIGHT (M)	BOTTOM BRACKET	MAX TYRE
2000 g	480 g	T47	47 mm

Radically overhauled, the Nemo Gravel represents our most intensely hybridized and extreme adventure gravel bike ever, entirely handcrafted by Cinelli's internal framebuilder in its Milanese HQ using custom drawn triple butted tube drawn by its sister company Columbus, less than 100 metres from the framebuilding workshop. Continuously refined over a one year period of testing by riders including former UCI World Champions, NYC courier legends, professional snowboarders and many other athletes pushing to redefine the limits of what gravel cycling can be, the Nemo Gravel is characterized above all by its completely redesigned geometry, 700 x 47mm tyre clearance and the use of the Hi-Ride Sterra fork with 20mm of true hydraulic travel. Together these features work to create a bike that is ready to tackle the world's most extreme gravel competitions and adventures.

hobootleg

Fine-tuned over a million kilometres and ten years of riding, the Hobo is our original, indestructible, go-anywhere travelmate. Today, in the new Hobootleg family powder-coated-paintjob, inspired by multiple textures of vintage Land Rover Defender 90.

hobootleg

complete bike

- The world's most reliable adventure bike
- Meticulously fine-tuned details for the most demanding adventures and adventurers
- Double-butted cromor tubes
- Electrophoretic paint
- Tubus racks
- Ovalized handlebar sections
- Spare wheel spokes for on-the-road repairs
- Ready-to-ride anywhere and everywhere, right out of the box
- Steering limitation system (Ergo Steering Stop)
- External cable routing

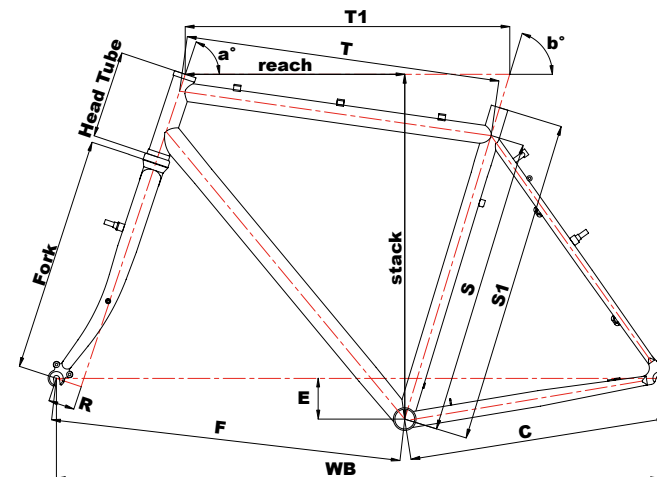

There is no adventure like a hoboing adventure. Since its original conception for the mythical Tour d'Afrique of 2012, the Hobootleg has been continuously fine-tuned across more than a million kilometres, all of the world's seven highest mountain passes, the Guinness World Record-holding globe crossing and many other adventures to become the world's most reliable adventure bike. Thanks to obsessive details such as double butted cromor tubes, electrophoretic paint, Tubus racks, ovalized handlebar and spare wheel spokes the Hobootleg is ready to ride straight out of the box, anywhere, for as long as you like, any way you like...

hobootleg geo

Our most advanced adventure bike ever, takes the characteristics of our indestructible Hobo and tunes them for technical and single-track journeys. Today, in the new Hobootleg family powder-coated-paintjob, inspired by multiple textures and materials of vintage Land Rover Defender 90.

hobootleg geo

frame-kit - complete bike

- Hardtail MTB-derived geometry
- Flared handlebars and 70mm stem for maximum control
- 6-eyelet “go-anywhere” Columbus Futura Adventure fork
- Adaptive geometry thanks to Columbus fork dropouts that allow to change the rake from 47 to 52 mm
- Cromor double-butted steel tubing
- Max tyre clearance 29x3,0”/ 27,5x3,0”
- All specs fine-tuned over a period of three years of testing

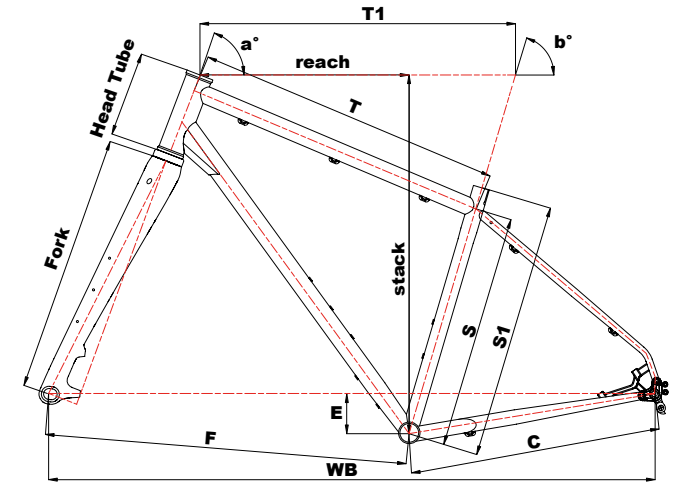

The Hobootleg Geo is Cinelli’s most advanced adventure bike ever. It has been designed to take the signature characteristics of our indestructible self-sufficient world-traveller, the original Hobo model, and tweak it for single-track, in particular technical mountain riding. Key features include flared handlebars, 6-eyelet fork, hydraulic disc brake caliper coupled with a mechanical actuator as well as a geometry that is derived from classic rigid mountainbikes. All details have been fine-tuned over a three-year testing period with our adventure ambassadors so that the bike is ready to tackle your most extreme rides straight out of the box without further modification.

hobootleg easy travel

A fast adventure bike for those who prefer STI levers and disc brakes.

Today, in the new Hobootleg family powder-coated-paintjob, inspired by multiple textures and materials of vintage Land Rover Defender 90.

hobootleg easy travel

complete bike

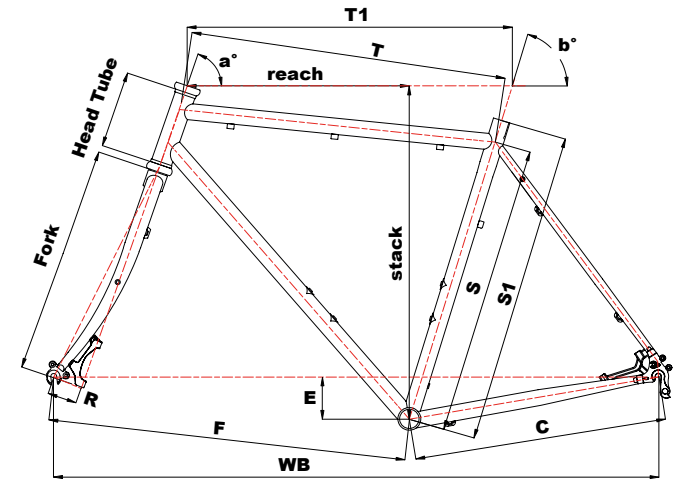

- Fast adventure geometry
- STI levers and bar disc brakes
- 44mm max tyre clearance
- Double-buttet cromor tubes
- Electrophoretic paint

The Easy Travel is a fast adventure bike for those who prefer STI levers to bar ends, disc brakes and less complicated road surfaces. The bike, of course, shares its signature characteristics such as double-buttet cromor tubes and electrophoretic paint with its older-cousin, the indestructible self-sufficient world-travelling Hobootleg.

BOOTLEG

silver bootleg concept

Bootleg is conceived of as a treatment applied to what was originally a performance bicycle, retuning its visual appearance as well as technical characteristics for new attempts at escaping the mental and physical limits of the city i.e. NEW STYLES OF URBAN CYCLING. All "Silver Bootleg" colour bikes are characterized by heavy-duty silver paint that mimics the aesthetic of raw aluminium, tone-on-tone raised branding (as though the bike had been stolen and repainted) and reflective details.

The Bootleg treatment has been applied to two famous existing Cinelli models, the Zydeco and the Tutto Plus, as well as the Tutto Mini.

tutto mini silver bootleg

frame-kit - complete bike

- Adjustable disc brake slider dropouts for both fixed gear, single speed and geared setups
- Total 19 eyelets for maximum versatility and cargo-carrying possibilities
- 25c wheels for the best compromise between speed and technical terrain handling, with max clearance for MTB tyres
- BMX-style single speed setup 180mm rise handlebars and 50mm stem
- Belt-drive compatible
- Quick-release seatpost for fast disassembly, increasing transport options
- Vintage American MTB-style segmented fork crown
- Silver Bootleg graphic concept including reflective details and 3D decals

The Tutto Mini is an ultra-hybridized homage to our roots and culture, from BMX to track bikes to gravel. Built on 25c wheels for the best compromise between easy packability, fast accelerations and true technical handling, the Tutto Mini can do anything you want it do: from slick fixed-gear riding to gravel touring to tricks and everyday urban commuting. The Tutto Mini frame is in fact a highly detailed, highly versatile piece of equipment that takes its design cues from our pioneering tracklocross bike, the Tutto Plus and features adjustable disc brake slider dropouts, a total of 19 eyelets, a vintage MTB-style segmented fork crown, reflective details, 3D decals and much, much, more.

zydeco silver bootleg

Cinelli's gravel icon goes underground: our best-selling Zydeco is transformed into the ultimate flat-bar and front rack go-everywhere city bike.

zydeco silver bootleg

complete bike

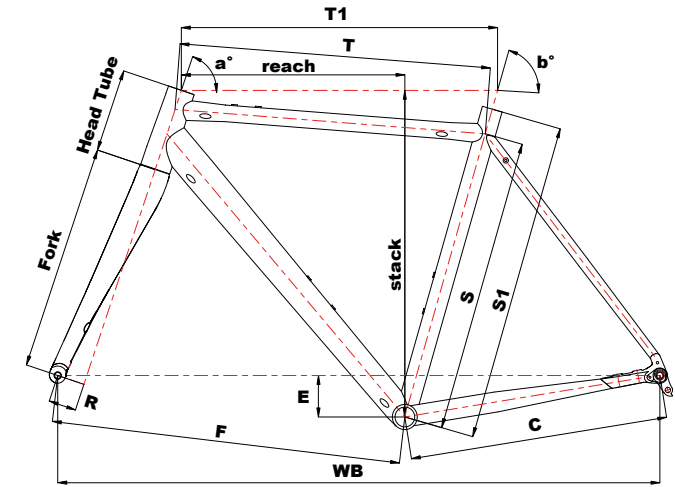

- Heavy duty front rack (max load 8kg)
- Super wide 20mm riser handlebars
- High quality oversized triple-butted aluminium tubing
- Custom rivet system allows user endless further bag and rag options
- Max tyre clearance 700x40c
- Silver Bootleg graphic concept including reflectivedetails and 3D decals

Straight out of the global headquarters of the new Cinelli Bootleg design department comes this: Cinelli's beloved gravel icon, the Zydeco, transformed into the ultimate flat-bar & front-rack go everywhere city bike. Designed to withstand the demands of the most intense urban commuting, the Zydeco Silver bootleg is equipped with a heavy duty aluminium front rack (max load 8kg), firmly anchored to a customized version of Columbus' X carbon fiber fork, super wide 20 mm riser handlebars, 700 x 35c tyres (max tyre clearance 40c), custom rivet system, reflective details, 3D decals and much, much, more.

tutto plus silver bootleg

The original “tracklocross” bike
and the world’s most hybridized
single-speed

tutto plus silver bootleg

complete bike

- Silver Bootleg graphic concept including reflective details and 3D decals
- The original multi-purpose multi-surface track frame
- Track dropouts with rear derailleur braze-ons for geared options
- 45mm fork rake
- Full mudguard eyelets
- Vintage MTB-style segmented fork crown
- Tyre clearance up to 45mm

Tutto Plus is the original do-everything high-performance urban- track frame, in constant evolution since first being launched 8 years ago. The bike can quickly morph from messenger work bike complete with front rack, to alleycat race bike to single-speed cross machine, to indestructible commuter. Made with butted steel tubes, the Tutto has been designed to be able to mount a rear derailleur and a modern road race wheel. A vintage MTB-style segmented TIG welded fork improves rigidity as well as the overall aggressive street-ready aesthetic of the bike and is complemented by the new Silver Bootleg graphic concept including reflective details and 3D decals.

vigorelli

The world's most famous track bike, born on the velodrome in Milan but a global cult for weaving through traffic...

Now in an entirely new graphic concept, inspired by a vintage Cinelli Laser unearthed in our archive.

vigorelli

frame-kit

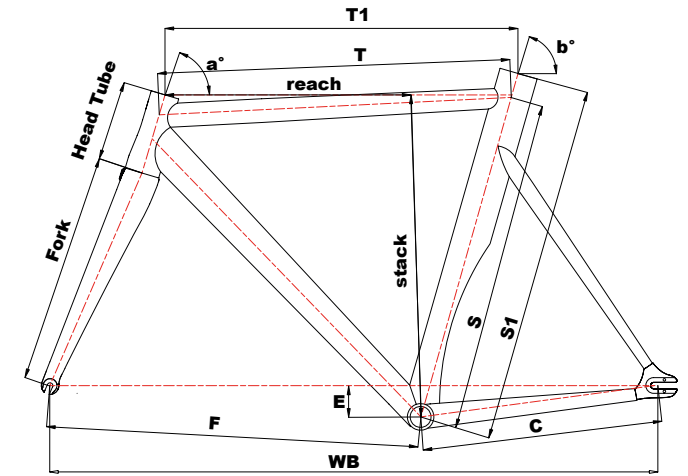

- Pure track reactive geometry (377mm chain stays in all sizes)
- Negative sloping top tube
- Aerodynamic blade seat tube
- Columbus Futura carbon monocoque carbon fork (1-1/8" – 1-1/2")
- UCI-approved for track competition

The new Vigorelli graphic concept simulates the look of a National Cycling Federation track frame that has continued to be used by many different riders (as would often occur with team bikes in national velodromes during the 70s and 80s) who have chosen to continue to add stickers and “restyle” the frame according to new trends and sponsors. Accordingly the frame offers, on top of its two-tone wet-on-wet paint, a layering of “retro” and “hypercontemporary” Cinelli logos and graphic styles.
